

Sea Smart Workshop

We've partnered with **Prince of Whales**, a Climate Positive designated marine adventure company, to bring you an exclusive **professional development workshop**! By providing you with the resources and knowledge to teach your students about ocean science, we aim to build a more responsible and ecologically conscious community.

About the Workshop

This three-hour workshop focuses on **acoustic disturbance** and how it affects Orcas in the Salish Sea. It's the perfect half-day learning activity for a professional development day. The format is a slideshow presentation with interactive elements including a creative design challenge to reduce the acoustic disturbance caused by ships.

Who?	Elementary, Middle, and High-School Teachers
When?	Monday, April 24, 2023
Where?	500-610 Main Street, Vancouver, BC V6A 2V3

About Sea Smart

We're a BC-based charity that was founded by a marine biologist to inspire and empower kids to love and protect our oceans. We provide **marine education** through school workshops, summer camps, professional development programs, and more!

Since our inception in 2016, we've empowered over 40,000 people through in-person programs and over 700,000 people in over 30 countries through our free online educator resources to become ocean heroes.

Why learn with Sea Smart?

Our educator programs are developed by teachers, for teachers! We've designed them to be engaging and useful.

You'll also receive resources to teach a 1-hour lesson on marine science to your students.

Book your program now!
